AK.4.OA.6 – Extend patterns that use addition, subtraction, multiplication division and symbols, up to 10 terms, represented by models (function machines), tables, sequences, or in problem situations).

AK.4.MD.4 – Solve real-world problems involving elapsed time between U.S. time zones (including Alaska Standard time).

AK.4.MD.6 – Explain the classification of data from real-world problems shown in graphical representations including the use of terms range and mode with a given set of data.

Yellow indicates the committee identified this standard as a Priority Standard and it is included on the District Benchmark Assessment.
